DETAILED ACTION

Claims 22-27 are pending in the instant application. Claims 1-21 have been canceled as 1. requested by Applicant in Preliminary Amendment C, Paper Number 3, filed August 30, 2001. All claims are currently under examination.

Oath/Declaration

2. The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because: Non-initialed and/or non-dated alterations have been made to the oath or declaration. See 37 CFR 1.52(c). Specifically, the Address of inventor Dan L. Eaton was changed, and the change was neither initialed nor dated.

Information Disclosure Statement

- The IDS has been considered by the examiner, however, the information will not be 3.1 published.
- Applicants are advised that the IDS had Ashkenazi et al., and not Baker et al., as 3.2 inventors.

Specification

The disclosure is objected to because it contains an embedded hyperlink and/or other 4.1 form of browser-executable code. Applicant is required to delete the embedded hyperlink and/or other form of browser-executable code. See MPEP § 608.01. For example, embedded hyperlinks are found on page 25, line 10, page 27, line 31, page 94, line 32 and page 96, line 13.

Art Unit: 1646

Appropriate correction is required.

4.2 The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

The following title is suggested: Antibodies to PRO344 protein.

4.3 The abstract of the disclosure is objected to because it does not specifically recite the claimed invention. Correction is required. See MPEP § 608.01(b).

Claim Objections

5. Claim 25 is objected to because of the following informalities: as written it is grammatically incorrect. It is suggested the claim be re-written as follows:

"A fragment of the antibody of claim 22, wherein the fragment binds the polypeptide of SEQ ID NO: 42."

Appropriate correction is required.

Advisory Information

6. Claim 25 is interpreted such that the fragment of the antibody must also bind the protein. If Applicants intend otherwise, it is suggested the claims be amended to clarify this.

Double Patenting

7. Applicant and the assignee of this application are required under 37 CFR 1.105 to provide the following information that the examiner has determined is reasonably necessary to the examination of this application. 37 CFR 1.78(b) provides that when two or more applications filed by the same applicant contain conflicting claims, elimination of such claims

Art Unit: 1646

from all but one application may be required in the absence of good and sufficient reason for their retention during pendency in more than one application.

A sequence search of the pending and published application databases has revealed that there are a series of applications in which SEQ ID NO: 42 is present but that do not claim the antibodies to the polypeptide. However, there are numerous other applications filed by the applicants which contain the polypeptide of SEQ ID NO: 362 which is identical to the polypeptide of SEQ ID NO: 42, and which may contain possible conflicting claims. Due to the large number of applications that contain this sequence, the examiner is unable to determine if any of these applications have claims directed to antibodies to this polypeptide. Applicant is required to point out to the Examiner all double patenting issues. See MPEP § 1.105.

The applicant is reminded that the reply to this requirement must be made with candor and good faith under 37 CFR 1.56. Where the applicant does not have or cannot readily obtain an item of required information, a statement that the item is unknown or cannot be readily obtained will be accepted as a complete reply to the requirement for that item.

This requirement is an attachment of the enclosed Office action. A complete reply to the enclosed Office action must include a complete reply to this requirement. The time period for reply to this requirement coincides with the time period for reply to the enclosed Office action.

Art Unit: 1646

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 8. Claims 22-27 are rejected under 35 U.S.C. 102(e) as being anticipated by Sheppard et al., US Patent No. 6,197,930, issue date March 6, 2001, effective priority date August 26, 1997. The effective priority date of the instant application is December 16, 1997 (60/069,694).

Claims 22-27 encompass antibody that binds to the polypeptide of SEQ ID NO: 42, wherein the antibody may be a monoclonal antibody, a humanized antibody, an antibody fragment, or labeled. Sheppard et al. disclose a protein (zsig39, SEQ ID NO: 2) that is identical to the polypeptide of SEQ ID NO: 42 of the instant application (see attached sequence alignment). Sheppard et al. also teach monoclonal, humanized and antibody fragments to the protein (column 35, lines 6-29), and antibody which is labeled (column 20, lines 53-65, column 36, line 47 to column 37, line 21).

Therefore, Sheppard et al. anticipates the claims.

Art Unit: 1646

Claim Rejections - 35 USC § 101

Page 6

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

9. Claims 22 and 27 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Claim 22 is directed to an antibody that binds to the polypeptide of SEQ ID NO: 50, and such an antibody could exist in nature. The rejection would be withdrawn if the word "isolated" were inserted in front of "antibody" (specification, page 33, lines 11-20).

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

10. Claims 22-27 are indefinite because claim 22 encompasses an antibody that binds to a polypeptide of SEQ ID NO: 42, and claim 27 encompasses an antibody that "specifically binds". The specification does not define the term "specifically binds" and it is not clear what this means, and it is not clear what the difference in scope between "binds" and "specifically binds" is. The other claims are rejected for depending from claim 22.

Conclusion

11. No claim is allowed.
